**Watch Time:** The time the symbol was put on watch to indicate it could alert.

**Alert Time & Price:** The time and price the symbol was at when the system calculated the trigger prices and alerted.

**Trigger Time & Price:** The time the symbol traded at the indicated trigger price. **Price is predicted to move 3%+ beyond trigger prices.**

**Trigger Type:** The direction the system predicted a 3%+ move could happen based on the trigger price.

**High/Low After & Move \$:** The day High/Low price beyond the trigger price and the difference in dollars.

**Move After %:** The % move beyond the trigger price. This is the key metric that shows how well our server predicted a 3%+ move beyond the trigger price. A move less than 3% is considered a failed alert by our standard but you could have profited based on when you entered/exited your trade.

**The minimum value possible is 0% which means the symbol traded at the trigger price then no higher/lower.**

**Watch Time:** The time the symbol was put on watch to indicate it could alert.

**Alert Time & Price:** The time and price the symbol was at when the system calculated the trigger prices and alerted.

**Trigger Time & Price:** The time the symbol traded at the indicated trigger price. **Price is predicted to move 3%+ beyond trigger prices.**

**Trigger Type:** The direction the system predicted a 3%+ move could happen based on the trigger price.

**High/Low After & Move \$:** The day High/Low price beyond the trigger price and the difference in dollars.

**Move After %:** The % move beyond the trigger price. This is the key metric that shows how well our server predicted a 3%+ move beyond the trigger price. A move less than 3% is considered a failed alert by our standard but you could have profited based on when you entered/exited your trade.

**The minimum value possible is 0% which means the symbol traded at the trigger price then no higher/lower.**

**Watch Time:** The time the symbol was put on watch to indicate it could alert.

**Alert Time & Price:** The time and price the symbol was at when the system calculated the trigger prices and alerted.

**Trigger Time & Price:** The time the symbol traded at the indicated trigger price. **Price is predicted to move 3%+ beyond trigger prices.**

**Trigger Type:** The direction the system predicted a 3%+ move could happen based on the trigger price.

**High/Low After & Move \$:** The day High/Low price beyond the trigger price and the difference in dollars.

**Move After %:** The % move beyond the trigger price. This is the key metric that shows how well our server predicted a 3%+ move beyond the trigger price. A move less than 3% is considered a failed alert by our standard but you could have profited based on when you entered/exited your trade.

**The minimum value possible is 0% which means the symbol traded at the trigger price then no higher/lower.**
